Forensic Studies 25

Next Step Summer School (780) 467-7929
dylan.shott@eips.ca

Course Description:

Forensic Studies 25 is the application of scientific principles, methods, and technologies for the purpose of solving debates including legal proceedings. Through the study of forensic science, students are given the opportunity to explore how scientific concepts from a variety of disciplines (biology, chemistry, and physics) apply specifically to this unique field. This Course will promote the importance of scientific literacy and problem-solving techniques. Emphasis is placed on Canadian Methods and legal protocols as students enhance their understanding of science and to explore this unique career area. This course is worth 3 credits.

Disclaimer: *A central component of the course involves the analysis of realistic scenarios and case studies. The course has some controversial or sensitive components including blood photographs and simulated blood experiments, discussion of semen analysis and the use of rape kits, and examination of alcohol and substance abuse.*

Course Structure:

Theme	Content	Assessment	Due Date
Introduction to Crime Scenes	● Processing the Crime Scene ● Role of Crime Scene Investigators, Medical Examiners, District Attorneysand Specialists ● The 7 S's of Crime Scene Investigation ● Crime Scene Safety	Assignment	
Types of Evidence	● Types of Physical Evidence ● Fingerprint Patterns ● Latent Fingerprint Enhancement ● Crime Case Studies InvolvingFingerprint Evidence	Assignment, Case Study Assignment	
Trace Evidence	● Collecting Trace Evidence ● Microscopic Analysis of Hair ● Fibre Analysis ● Crime Case Studies InvolvingMicroscopic Evidence	Assignment, Case Study Assignment	
Body Fluid Evidence	● All About Blood ● Blood Evidence ● Other Body Fluid Evidence ● Crime Case Studies Involving BodyFluid Evidence	Assignment, Case Study Assignment	

Impaired Driving	● Alcohol and Its Effects upon theHuman Body ● The Breathalyzer ● The Intoxilyzer and Consequences ofImpaired Driving ● Crime Case Studies Involving ImpairedDriving	Assignment (Case Study included in this assignment)	
Polygraphing and Document Analysis	● Stress indicators and the PolygraphInstrument ● The Polygraph Examination ● Forensic Writing Analysis ● Case Studies Involving Polygraph And Forensic Writing Analysis	Assignment, Case Study Assignment	
Forensic Genetics	● DNA – Molecule behind ForensicGenetics ● The Forensic Use of MitochondrialDNA ● DNA Profiling and PopulationFrequency ● Crime Case Studies Involving ForensicGenetics	Assignment, Case Study Assignment	
Careers in Forensic Science	● Careers in Forensic Science ● Post-Secondary Programs related toForensic Science ● The CSI Effect	Assignment	
Module Assessments	● demonstrate knowledge and understanding of lessons in Modules 1-7	Quiz	
Final Exam	● Review of Course Material	Exam (must come into a school to complete)	

Important Dates: 1: Modules 1-3 must be completed and submitted by Wednesday, July 10th, 2024.
2: Modules 4-6 must be completed and Submitted by Wednesday July 17th, 2024.
3: Modules 7-8 and the Final Exam must be completed and Submitted by Wednesday, July 24th, 2024.

Assessment:

Assignments are worth 60% of your final mark and online quizzes make up 25% of your final mark. The final exam is worth 15% of your final mark.

PowerSchool:

Make sure you are accessing PowerSchool regularly to monitor your progress and review assessment information. The due dates provided will be placed in the comment area for each assignment. This allows the teacher to keep track of your progress and to ensure you complete the course. If you are not going to meet a deadline, please contact your teacher with a plan on when you expect to submit the missed assignment. This will be noted in the assignment comments. Any assignment not handed in by the due date will receive an NHI until the assignment is handed in. Late assignments will be flagged as late unless you have previously communicated with your teacher. Any assignment handed in will be checked off, when the assignment is assessed, a percentage mark will be entered. If something does not seem correct, or information appears to be incorrect, please contact your teacher so errors can be fixed promptly.

Additional Credit: As part of your course you will also be receiving credit for *Student Centered Learning* (3 credits) as well as *COM 1255* (1 credit). Outcomes for these courses are already achieved via display of skills through normal course achievement.
