

Eight-game teacher review

Science 24 | Standalone supplemental practice | Teacher decision pending

Candidate: Science24-v2.0.1-rc1-a6e3202c2cd0

Source snapshot SHA256:

a6e3202c2cd0eaf6613fdc0ea9fa0edf7572916c83dce6de43ca89617e865e0a

Open START_REVIEW.html and inspect all six scenarios in each game. Read TEACHER_GUIDE.html for independent solutions, alternatives, misconceptions and reasoning rubrics. Record findings for the exact candidate named above.

Model correctness, support use, completion, learner self-review and teacher judgment are separate. First transfer responses are preserved; revisions cannot be labelled independent first-attempt success.

Review VALIDATION_STATUS.json and the visual comparisons before approving. A blocked visual gate is an outstanding requirement, even when science and browser flows pass. Manual checks that were not performed stay Not tested.

Review outcomes against CURRICULUM_TASK_MAP.md and the official Alberta program. These supplemental games do not cover the full course. No secure assessments, SCORM, grades, publishing or course placement are included.

A substantive change invalidates affected approval. Do not reuse this form for a different source snapshot. Approval must be the actual reviewer decision; this unsigned file certifies nothing.

Overall decision

A1 Reaction Detective

Science 24 | Standalone supplemental practice | Teacher decision pending

Candidate: Science24-v2.0.1-rc1-a6e3202c2cd0

Source snapshot SHA256:

a6e3202c2cd0eaf6613fdc0ea9fa0edf7572916c83dce6de43ca89617e865e0a

Reviewer name

Date (YYYY-MM-DD)

Science judgment

Curriculum and level judgment

Usability findings (flow, navigation, revision and transfer)

Accessibility findings and checks actually performed

Required revisions, alternatives and explanation-rubric findings

Game decision

Approving this game does not establish complete course coverage, target-LMS operation or completion of unperformed manual checks.

A2 Atom Factory

Science 24 | Standalone supplemental practice | Teacher decision pending

Candidate: Science24-v2.0.1-rc1-a6e3202c2cd0

Review evidence and open checks

Science 24 | Standalone supplemental practice | Teacher decision pending

Candidate: Science24-v2.0.1-rc1-a6e3202c2cd0

Source snapshot SHA256:

a6e3202c2cd0eaf6613fdc0ea9fa0edf7572916c83dce6de43ca89617e865e0a

Technical evidence: see VALIDATION_STATUS.json, validation/ and candidate.json. Inspect screenshots and unchanged premium PNG references. Receipts identify the actual HTTP and offline browser checks; A1 evidence is reusable only while its frozen hashes match.

Native browser 200% zoom: Not tested. Real screen-reader operation: Not tested. Safari and Firefox: Not tested. Physical phone/tablet: Not tested. Chromium viewport checks and keyboard checks are not substitutes for those results.

Visual exactness target: 99.25% pixel agreement and 4 px geometry tolerance outside documented corrections. No entire learning panel is masked. The unmasked premium comparison includes corrected scenario values, new photos and real controls. Title, feedback, transfer and mobile snapshots lack independently approved premium references.

Science sources: Alberta Science 24 program; PHAC respiratory transmission guidance; MedlinePlus inheritance-risk assessment; OpenStax Physics impulse. Complete links and coverage limits are in CORRECTIONS.md and CURRICULUM_TASK_MAP.md.

Suggested review sequence: read evidence; solve transfer independently; inspect supported and reduced-support tasks; test revision/back navigation/restart; review all six explanations and acceptable alternatives; record judgment and required revisions; approve only the reviewed candidate.

Use the accessible text alternative if your PDF viewer does not support form controls. Save a copy of the completed form. All decision fields default to Not reviewed; approval records default to pending.
