

Phys. Ed. 10 CFL/Virtual Learning/Spruce Grove Outreach

The curricular expectations for Physical Education 10 are outlined below (actual program of study outcomes included at the back of this package). We have broken up the outcomes into groups with each group of outcomes assigned a weighting for your grade in the course.

You need to have a passing grade for each group of outcomes to receive a passing grade in the course, meaning **you need to complete 50% or more of the outcomes for each group**.

Group 5 (CPR/First Aid) will be covered through the Simple CPR course that can be completed online.

***CPR/First Aid is done through an online course provide (simple CPR) and the cost is \$35 to the student which will be payable in your PowerSchool**

Practical Component		
Movement Outcomes Group 1 (15%) 5 outcomes	Alternative Outcomes Group 2 (15%) 5 outcomes	Participatory Outcomes Group 3 (20%) 9 outcomes
Basic Skills - Locomotor	Application of Basic Skills in an Alternative Environment	Fair Play
Basic Skills - Nonlocomotor		Leadership
Basic Skills - Manipulative	Application of Basic Skills in Dance (2 outcomes)	Teamwork (2 outcomes)
Application of Basic Skills in Games (2 outcomes)	Application of Basic Skills in Types of Gymnastics	Effort (2 outcomes)
	Application of Basic Skills in Individual Activities	Safety
		Active Living in the Community (2 outcomes)

Individual Study	
Academic Outcomes Group 4 - Module Component (35%) 11 outcomes	CPR/First Aid Group 5 - CPR & First Aid (15%) 2 outcomes
Functional Fitness (3 outcomes)	Safety
Body Image (2 outcomes)	Well-being
Well-being (3 outcomes)	*CPR/First Aid is done through an online course provide (simple CPR) and the cost is \$35 to the student which will be payable in your PowerSchool
Communication (2 outcomes)	
Goal Setting/Personal Challenge	

Meeting Outcomes

Students will have a number of ways that they can meet the practical component outcomes for Phys. Ed. 10.

1. *Participation in community based programming coordinated by Parkland School Division*

These have included Boxing, the Remuda equestrian program, Physical Literacy programming at the Tri-Leisure centre, Yoga and others in the past. Program coordinators will track participation hours and provide information on skill development and participation.

2. *Participation in programming coordinated by the student/family*

This would include any recreation program/individual sport/team sport that the student participates in. The student will be provided with forms to collect information from their coaches/program coordinators as to skills developed and participation.

3. *Participation in activity developed by the student*

This would include individually developed programming such as a workout plan at a local gym, a running/jogging/walking plan, participation on a recreational team etc. This path would require meetings and, potentially, observations by a teacher. Plans for these activities would need to be developed.

4. *Participation in a clinic, seminar, camp, course or training*

This would include any learning situation where specific skills are developed or outcomes are met. These would include a sport camp, a coaching clinic, a training session, course or seminar that was connected to a physical activity or other related PE 10 outcome.

This course is based on a three credit model for Physical Education 10. In certain situations, a four or five credit plan can be developed with the teacher that would require meeting outcomes in multiple ways. For example, meeting the Basic Skills - Locomotor outcome in a number of different activities rather than through one activity. If you are interested in planning a program to receive four or five credits be sure to mention that when you meet with the Phys. Ed. Teacher.

Sample pathways to PE 10 Completion

Below we look at three possible student pathways to meeting the outcomes required for Physical Education 10. Students can determine their own pathway to meeting the outcomes, with assistance from the teacher.

Student A	Student B	Student C
Participation in Multi-Sport at the Tri-leisure Centre on Fridays (<i>Four Outcomes from Group 1 - Locomotor, Manipulative, Application of Basic Skills in Games [2]</i>) Dance through 'Just Dance' game along with a dance routine designed by the student, recorded and shared with the teacher via video (<i>Two Outcomes from Group 2 - Dance</i>) Self-directed swimming activity, working on various strokes on their own at the Tri-Leisure Centre (<i>Two outcomes from Group 2 - Individual Activities and Alternate Environments</i>) Self-directed skiing program developed by the student with support from the teacher (<i>Two Outcomes from Group 2 - Individual Activities and Alternate Environments</i>) Written Student Reflection on activities participated in during the course (<i>9 Outcomes from Group 3 - Fair Play, Leadership, Teamwork [2], Effort [2], Safety, Active Living in the Community [2]</i>) PE Module covering 11 outcomes - <i>Functional Fitness [3], Body Image [2], Well-being [3], Communication [2], Goal Setting/Personal Challenge</i> CPR/First Aid course covering two outcomes - <i>Safety, Well-Being</i>	Self-directed walking/jogging program developed by the student with support from the teacher (<i>One Outcome from Group 1 - Locomotor, One Outcome from Group 2 - Individual Activities</i>) Yoga for Life at Stony Plain Outreach on Wednesdays (<i>One Outcome from Group 1 - Nonlocomotor, One Outcome from Group 2 - Individual Activities</i>) Design a game written activity (<i>One Outcome from Group 1 - Application of Basic Skills in Games</i>) Dance class along with a dance routine designed by the student and shared with the teacher via video (<i>Two Outcomes from Group 2 - Dance</i>) Written Student Reflection on activities participated in during the course (<i>9 Outcomes from Group 3 - Fair Play, Leadership, Teamwork [2], Effort [2], Safety, Active Living in the Community [2]</i>) PE Module covering 11 outcomes - <i>Functional Fitness [3], Body Image [2], Well-being [3], Communication [2], Goal Setting/Personal Challenge</i> CPR/First Aid course covering two outcomes - <i>Safety, Well-Being</i>	Participation on a community hockey team (<i>Three Outcomes from Group 1 - Locomotor, Manipulative, Application of Basic Skills in Games</i>) Self-directed weight training program (<i>One Outcome from Group 2 - Individual Activities</i>) Hiking Trip to Jasper (<i>One Outcome from Group 2 - Alternate Environments</i>) Dance through 'Just Dance' game (<i>One Outcome from Group 2 - Dance</i>) Written Student Reflection on activities participated in during the course (<i>9 Outcomes from Group 3 - Fair Play, Leadership, Teamwork [2], Effort [2], Safety, Active Living in the Community [2]</i>) PE Module covering 11 outcomes - <i>Functional Fitness [3], Body Image [2], Well-being [3], Communication [2], Goal Setting/Personal Challenge</i> CPR/First Aid course covering two outcomes - <i>Safety, Well-Being</i>

Group Descriptions

Group 1 (15%) 5 outcomes	Description
Basic Skills - Locomotor <i>A10–1 apply and refine locomotor skills and concepts—effort, space and relationships—to perform and create a variety of activities to improve personal performance</i> Basic Skills - Nonlocomotor <i>A10–3 apply and refine nonlocomotor skills and concepts—effort, space and relationships—to perform and create a variety of activities to improve personal performance</i> Basic Skills - Manipulative <i>A10–5 apply and refine manipulative skills and concepts—effort, space and relationships—to perform and create a variety of activities to improve personal performance</i> Application of Basic Skills in Games <i>A10–10 adapt and improve activity specific skills in a variety of games</i> <i>A10–11 select, plan and create games that incorporate simple and more challenging strategies and tactics</i>	Developing skills of movement: - Include walking, running, leaping, jumping, hopping, galloping, sliding and skipping. - They can be built upon to create routines in games/sports (specific movements in a sport) - Can involve moving in different directions, at different speeds, and in different pathways (curves, straight lines, zig-zags etc.) - These skills will exist in a large majority of physical activities. Developing skills where the body remains in place, does not require the body to move or incorporate objects into movement: - Non-locomotor skills include stretching, bending, pulling, pushing, swaying, twisting, log rolling and balancing. - Easily identified in gymnastics and yoga but exist in many other areas and often accompany movement (locomotor) skills: bending knees when jumping, swinging arms when running, rotating your torso and transferring weight when you hit a baseball or swing a golf club. Developing skills that involve the control of objects primarily with the hands and feet: - These include throwing, catching, striking, and kicking - If an activity involves a ball or a puck, a club, bat or racquet, then manipulatives are used - Passing, shooting, hitting, blocking, and serving are all examples of specific skills related to manipulatives. Developing skills that are involved in the playing of games/activities: - Applying locomotor, non locomotor or manipulative skills that relate to a specific game or activity - For example, passing a ball or catching a ball are manipulative skills, but in a specific sport/game they may have more specific targets than just passing or catching. Passing and catching can look different in baseball, basketball and football. - To achieve this out come you will need to create a cooperative game or challenge with a partner or small group that focuses upon the application of specific strategies; e.g., moving into a space, person-to-person defence, getting back into position. You can teach the game or activity to a class or group, or prepare a lesson that COULD be taught to a class or group if you don't have the opportunity to do so.

Group 2 (15%) 5 outcomes	Description
Application of Basic Skills in an Alternative Environment <i>A10–7 adapt and improve activity specific skills in a variety of environments; e.g., camping, canoeing, survival skills</i> Application of Basic Skills in Dance <i>A10–8 apply the principles of dance to improve performance</i> <i>A10–9 choreograph and perform dances for self and others; e.g., jazz, social and novelty</i> Application of Basic Skills in Types of Gymnastics <i>A10–12 apply the basic skills in combination with each other with personal proficiency in a variety of gymnastic experiences individually, with a partner, or in a group; e.g., educational, rhythmic and artistic</i> Application of Basic Skills in Individual Activities <i>A10–13 adapt and improve activity specific skills in a variety of individual pursuits; e.g., resistance training, aerobics</i>	Application of skills in land- or water-based activities in alternative environments: - <i>These include swimming, hiking, orienteering, camping, skiing, snowshoeing, rock climbing etc.</i> Application of skills in a wide variety of dance experiences to enhance development of creative, expressive and rhythmical movements: - <i>Perform dance steps from a dance form or a number of dance forms</i> - <i>Show improvement in the dance skills through practice</i> - <i>Choreograph and perform a dance that includes a number of different steps. Can be performed in person for a teacher or recorded and submitted on video.</i> Application of basic skills in movement challenges that enable them to develop poise, grace, rhythm, coordination, balance, strength, flexibility and effective body mechanics. - <i>Develop basic gymnastics skills that can then be used in combination</i> - <i>Perform a floor/mat routine that shows ability in body movement and control. Can be performed in person for a teacher or recorded and submitted on video.</i> Application of basic skills in activities that involve running, jumping and throwing activities; individual manipulatives; combative or self-defense activities; and/or target activities. - <i>These could include skills in a large number of individual activities including track and field, archery, bowling, golf, weight training/weight lifting, running, tennis, badminton etc.</i>

Group 3 (20%) 9 outcomes	Description (These outcomes will be met through written student reflections for each outcome. These reflection prompts will be provided.)
Fair Play <i>C10–3 demonstrate etiquette and fair play</i> Leadership <i>C10–4 describe, apply, monitor and assess leadership and followership skills related to physical activity</i> Teamwork (not able to complete if only participating in individual activities) <i>C10–5 develop and apply practices that contribute to teamwork</i> <i>C10–6 identify and demonstrate positive behaviours that show respect for self and others</i> Effort <i>D10–1 demonstrate a commitment to an active lifestyle through participation in and out of class</i> <i>D10–2 develop a personal plan that is self-motivating and encourages ongoing participation</i> Safety <i>D10–3 select and apply rules, routines and procedures of safety in a variety of activities</i> Active Living in the Community <i>D10–8 investigate participation in community activity programs for all ages and the influences that affect participation</i> <i>D10–9 demonstrate decision-making skills that reflect choices for daily activity within the school and the community</i>	• Students will demonstrate positive behaviour during activities and an understanding of the application of rules/regulations. • Students will demonstrate appropriate leadership and followership skills within their activities. • Students will demonstrate teamwork in their activities. This could be done in paired or small group activities or with teammates in a sporting activity. Students will show the ability to interact with others in a positive way. • Students will put forth an effort in their participation in activities and develop an individualized plan for an ongoing active lifestyle. • Students will demonstrate an ability to participate in activities while adhering to the necessary rules, regulations and safety measures. • Student will explore active living in the community by participating in programming/activities in their community. Students will be able to share their healthy decision-making skills in the choices they make for daily activity.
