

CREDIT GAUNTLET

What is ready to build

v0.2 • October 6, 2026 • hypothetical CALM loan scenario

A coherent decision game, with the numbers settled

- Compare monthly affordability with total borrowing cost.
- Inspect what a payment does before learning the terminology.
- Carry the same debts through twelve payments and one rate event.
- Compare two repayment strategies from the same checkpoint.

Actual supplied assets

Ready assets, with a clear boundary

40 original PNGs verified. This kit contains reusable components, not completed game screens.

The supplied art is flatter than the earlier shaded retro references. These pages show a proposed arrangement for review.

No playable code, course integration or grading changes have been made. Teaching is mapped to FL2-03/04/06; live-course placement and runtime tests remain gates.

CREDIT GAUNTLET

S02 Compare the loan

See the trade-off before choosing • 60-month comparison shown

Fixed rate

6.5%

\$234.79

vehicle payment each month

Other required payments: \$105.00

Available debt budget: \$340.00

Interest if rate stays: \$2,087.68

INSPECT ONE PAYMENT

Variable rate

5.0% initially

\$226.45

vehicle payment each month

Other required payments: \$105.00

Available debt budget: \$340.00

Interest if rate stays: \$1,587.33

INSPECT ONE PAYMENT

Choose a repayment period

36 months

60 months

84 months

36-month choices exceed this budget. A longer period lowers each payment but can increase total interest.

CREDIT GAUNTLET

S03 + S05 Explain, then change one condition

Primary route: variable rate, 60 months • values use the v0.2 cents ledger

Where does the first payment go?

\$226.45

one monthly payment

\$50.00 interest

\$176.45 reduces principal

Principal is the borrowed amount still owed.
Interest is the cost charged for this period.

This payment is mostly principal. The interest share becomes smaller as the debt falls.

After twelve payments

\$9,833.39 still owed

5.0% → 6.5%

48 scheduled payments remain

\$226.45 → \$233.20

Increase: \$6.75 per month

This variable contract adjusts the payment to keep the original repayment date. The fixed contract does not change.

The change is modest here. Do not exaggerate it into an instant default.

CREDIT GAUNTLET

S07 Choose where the extra money goes

Minimums first • shared checkpoint • same \$490 monthly debt budget

Required: \$338.20

Extra: \$151.80

Reserve: \$200

Small personal loan

\$513.87

11% annual rate

Required minimum paid first

Store card

\$2,164.71

24% annual rate

Required minimum paid first

Vehicle loan

\$9,833.39

6.5% annual rate

Required minimum paid first

Avalanche
Extra targets the store card first

Highest interest rate first. Predict what this changes about total interest.

Snowball
Extra targets the small loan first

Smallest balance first. Predict how soon one debt disappears.

CREDIT GAUNTLET

S10 Compare the same journey

Primary route results • every figure is derived from the exact cents ledger

Avalanche

\$1,226.69

interest after the checkpoint

29 months after checkpoint

Story month 41: all three debts cleared

First balance cleared: month 11

Interest since borrowing: \$2,416.06

Separate reserve retained: \$200

Snowball

\$1,271.23

interest after the checkpoint

29 months after checkpoint

Story month 41: all three debts cleared

First balance cleared: month 3

Interest since borrowing: \$2,460.60

Separate reserve retained: \$200

\$44.54 less interest, or an earlier first payoff

Both finish in 29 months here. Explain the trade-off using the evidence.

CREDIT GAUNTLET

Responsive layout and recovery

Phone layout is reorganized, not a shrunk desktop screen

CHOOSE A STRATEGY

Debt budget \$490

Minimums \$338.20 • extra \$151.80

Small loan • 11%

\$513.87

Store card • 24%

\$2,164.71

Vehicle • 6.5%

\$9,833.39

AVALANCHE

SNOWBALL

When a choice does not fit

- Show the exact budget gap before any financial state changes.
- Offer Return to choices and an explanation, not a shame message.
- A rate event is applied once; reopening its panel cannot charge again.
- Pause, month-step and replay keep the same starting conditions.

Required implementation checks

- Keyboard focus and 44 px touch targets
- Readable text, plain reading panels, 200% zoom
- Graph data also available as a table
- Reduced motion and reliable save / reload

CREDIT GAUNTLET

Actual supplied art inventory

40 mandatory assets present • originals preserved • no new generation required

Documented exceptions: button gutters, pressed visual offset, IC05 centering, textured backgrounds. Use stable wrappers and plain reading panels; inspect the detailed report before implementation.

Static preproduction preview • supplied art + exact data • not a playable game
