For Users of Alberta Distance Learning Centre Courseware

Much time and effort is involved in preparing learning materials and activities that meet curricular expectations as determined by Alberta Education. We ask that you respect our work by honouring copyright regulations.

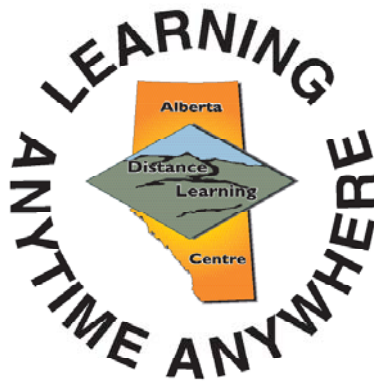

Alberta Distance Learning Centre has an Internet site:

<http://www.adlc.ca>

The Internet can be a valuable source of information. However, because publishing to the Internet is neither controlled nor censored, some content may be inaccurate or inappropriate. Students are encouraged to evaluate websites for validity and to consult multiple sources.

Forensic Science 35
Assignment Booklet 2
Law Enforcement Protective Equipment
and Police Canines

Instructions for Submitting Assignment Booklets

1. Submit Assignment Booklets regularly for correction.
2. **Submit only one Assignment Booklet at one time.** This allows your teacher to provide helpful comments that you can apply to subsequent course work and exams (if applicable).
3. **Check the following** before submitting each Assignment Booklet:
 - o Are all assignments complete?
 - o Have you edited your work to ensure accuracy of information and details?
 - o Have you proofread your work to ensure correct grammar, spelling, and punctuation?
 - o Did you complete the Assignment Booklet cover and attach the correct label?

Postal Mail

Determine sufficient postage by having the envelope weighed at a post office. (Envelopes less than two centimetres thick receive the most economical rate.)

Fax

Assignment Booklets may be faxed to Alberta Distance Learning Centre: **780-674-6977**

E-mail

Assignments may be e-mailed as attachments to the usual e-mail message to your teacher. Submit all assignments of any one Assignment Booklet at one time, ensuring that all activities are clearly labelled. Contact your teacher for his or her e-mail address.

Your **document** must be in Microsoft Word, Rich Text Format (RTF), or PDF format.

Your **e-mail message** must include the following information:

Subject: Student Name / Course Name
Message: Your Full Name
Your Student File Number
Course Name
Assignment Booklet Number

EXAMPLE

Subject: John Doe/Forensic Science 35
To: My Teacher@adlc.ca
Re: Assignment Booklet Submission

Assignment Booklet 2

Forensic Science 35

Assignment Booklet 2

Assessment

For successful completion of this course, you must

- 1. Complete all questions in each Assignment Booklet to the best of your ability.**
Incomplete Assignment Booklets will be returned unmarked.
- 2. Achieve at least 40% on the final exam.**
In accordance with Alberta Distance Learning Centre policy, the final exam is worth 50% of the final course mark.
- 3. Achieve a final course mark of at least 50%.**

Process

- **Read the course material** before working on the activities in this Assignment Booklet. The *Forensic Science 35 Student Module Booklets* contain the information necessary for successful completion of your work.
- **Proceed carefully** through each assignment. Reflect upon your answers and prepare your written responses to communicate your thoughts effectively. Time spent in planning results in better writing.
- **Proofread your work** before submitting it for marking. Check for content, organization, paragraph construction (if applicable), grammar, spelling, and punctuation.
- **If you encounter difficulties or have any questions**, contact your course teacher at Alberta Distance Learning Centre for assistance.

Format

If you choose to **use a word processor** for your written work,

- format your work using an easy-to-read 12-point serif font such as Times New Roman
- include your full name and student file number as a document header
- double-space your final copy
- staple your printed work to this Assignment Booklet

Avoid plagiarism by acknowledging all sources you use. Contact your teacher if you are uncertain how to document sources.

Although you are encouraged to work collaboratively and discuss various aspects of this course with others, **all submitted work must be your own.**

Our Pledge to Students

Alberta Distance Learning Centre is committed to helping students achieve their educational goals. We look forward to assisting students who are sincere in their desire to learn. Students may contact their course teacher(s) by phone, e-mail, fax, postal mail, or in person at an Alberta Distance Learning Centre office.

Lesson 1 Assignment: The Bullet-resistant Vests and Conducted Energy Devices

Value
10

Part A: Multiple-Choice Questions

Decide which choice best completes the statement or answers the question. Print the letter that corresponds to your choice on the blank next to the question.

- C** 1. Soft body armour, such as the bullet-resistant vest, prevents injury from a gunshot by
- A. causing the fired bullet to ricochet
 - B. decreasing the mass of the fired bullet
 - C. absorbing the impact of the fired bullet
 - D. increasing the fired bullet's kinetic energy
- A** 2. Bullet-resistant vests are made from
- A. multiple thin layers of Kevlar fabric
 - B. a single thick layer of Kevlar fabric
 - C. thirty layers of Kevlar interwoven with silk fabric
 - D. several fine layers of Kevlar and nylon fabric
- D** 3. A bullet-resistant vest provides effective protection from
- A. ice pick
 - B. rifle round
 - C. shotgun slug
 - D. handgun bullet
- D** 4. When a bullet hits a bullet-resistant vest containing Kevlar, the vest causes the bullet to
- A. bounce
 - B. explode
 - C. ricochet
 - D. mushroom

B 5. Kevlar breaks down quite quickly when it is exposed to

- A. oxygen and sulfuric acid
- B. moisture and ultraviolet rays
- C. gunpowder and cool temperatures
- D. nitrogen and unstable intermediates

 C 6. How does a Conducted Energy Device (CED) immobilize a suspect?

- A. It stops neuron activity in the brain.
- B. It reduces sensitivity of the skin.
- C. It disrupts superficial muscle function.
- D. It prevents the uptake of oxygen in the lungs.

 A 7. The CED targets a pair of body systems:

- A. nervous and muscular
- B. respiratory and skeletal
- C. digestive and immune
- D. circulatory and sensory

 A 8. Which of the following symptoms are experienced after being hit by a CED?

- A. Pain, paralysis, and disorientation
- B. Anger, guilt, and low blood pressure
- C. Depression, tiredness, and loss of hearing
- D. Nausea, sadness, and temporary blindness

 B 9. Use of the CED on an individual causes an increase in

- A. protein digestion
- B. lactate production
- C. oxygen destruction
- D. carbon dioxide absorption

- D** 10. When the dart-like electrodes of the CED penetrate a target, they release
- A. oxygen
 - B. carbon dioxide
 - C. a small gas charge
 - D. an electrical charge

Value
2

Part B: Numeric-Response Questions

Use the following information to answer the next question.

Various Molecular Traits

- 1. Natural polymer
- 2. Synthetic polymer
- 3. Radial composition
- 4. Square composition
- 5. Contains hydrogen bonds
- 6. Contains only single bonds
- 7. Fibres oriented in a circular pattern
- 8. Fibres oriented in a parallel arrangement

①

1. Four molecular traits of Kevlar, as shown above, include **2** , **3** , **5** , and **8** .

Record your choices in ascending order.

Use the following information to answer the next question.

Various Molecular Traits

- 1. The trigger of the CED is pressed.
- 2. Electrical current flows into a step-up transformer.
- 3. The voltage produced by the CED increases.
- 4. The oscillator converts energy from the batteries into a stable electrical resonant circuit.

①

2. The correct sequence of the steps shown above occurring in a functioning CED are **1** , **4** , **2** , and **3** .

Value
11

Part C: Written-Response Questions

Provide appropriate answers to the following. Explanations are best given in sentences.

④

1. Identify two advantages and two disadvantages of Kevlar in bullet-resistant vests.

Any two of the following advantages are acceptable for 2 marks

- *diffuses the force of low and medium velocity bullet impact*
- *absorbs the kinetic energy of low and medium velocity bullets*
- *5 times stronger than steel*
- *lightweight*
- *flexible*
- *does not rust or corrode*
- *absorbs vibrations*

Any two of the following disadvantages are acceptable for 2 marks

- *expensive*
- *breaks down in sunlight*
- *does not stop high-velocity rifle sounds*
- *does not prevent injury from bladed weapons*
- *breaks down when washed*

②

2. Explain a trauma plate and why it is inserted into a bullet-resistant vest.

A trauma plate is a ceramic or metal plate surrounded by several layers of kevlar. 1 mark

It helps prevent injury to the heart, lungs, and ribs that may arise from "blunt force trauma", a type of injury sustained by the sudden force of a bullet pushing but not quite completely penetrating a vest. Blunt force trauma can cause severe bruising, cracked ribs, or even death. 1 mark

②

3. Describe how the symptoms of being contacted with the CED for one-second differ from the symptoms of a five-second CED contact.

A one-second contact with a CED will startle the attacker and cause a certain amount of pain associated with nerve and muscle disruption. 1 mark

An electrical charge lasting in cycles of five seconds causes a continuous contraction of muscles throughout the subject's body, resulting in a loss of balance and muscle control as well as temporary cognitive disorientation. 1 mark

③

4. Identify three advantages to the use of CEDs by police officers.

Any three of the following disadvantages are acceptable for 3 marks

- *has lowered number of office-involved firearms-related shootings*
- *can be used as a contact weapon or as a projectile weapon*
- *immobilizes suspect without causing long-term injuries*
- *can be deployed quickly*
- *does not break bones*
- *does not cause soft tissue damage*
- *the sight of it or warning of it subdues many suspects without having to use it*

Lesson 2 Assignment: Pepper Spray and Tear Gas

Value
10

Part A: Multiple-Choice Questions

Decide which choice best completes the statement or answers the question. Print the letter that corresponds to your choice on the blank line next to the question.

- C** 1. The active ingredient in standard police issue pepper spray is
- A. chili
 - B. cayenne
 - C. capsaicin
 - D. capsicum
- B** 2. Pepper spray is an inflammatory agent that causes immediate swelling of the eyes because of
- A. skin irritation
 - B. capillary dilation
 - C. uncontrollable coughing
 - D. mucous membrane inflammation
- A** 3. Which of the following could be used to minimize the effects of pepper spray?
- A. Milk
 - B. Water
 - C. Apple juice
 - D. Tomato juice
- D** 4. The use of pepper spray by police officers is considered advantageous because it
- A. affects only the eyes and skin
 - B. damages only bone and soft tissue
 - C. costs less than a single canister of tear gas
 - D. can be deployed quickly and works quickly

- C** 5. Pepper spray is the most effective at disabling a suspect when the percentage of OC in the spray is
- A. 0.5% - 1%
 - B. 1% - 2%
 - C. 2% - 10%
 - D. 15% - 20%
- C** 6. Both pepper spray and tear gas are
- A. lethal weapons
 - B. riot control agents
 - C. lacrymatory agents
 - D. poisonous weapons
- B** 7. At room temperature, 2-chlorobenzalmalononitrile (CS), the active ingredient in tear gas, is a
- A. gas
 - B. solid
 - C. liquid
 - D. semi-solid
- D** 8. Which of the following is most effective when used to remove CS from a surface?
- A. Juice
 - B. Water
 - C. Vinegar and water
 - D. Baking soda and water
- A** 9. Inhalation of CS causes coughing and breathing difficulties because it
- A. irritates the lining of the trachea
 - B. increases tear production in the eyes
 - C. increases mucous production in nose
 - D. causes a burning sensation in the mucous membranes

- A** 10. What percentage of people seek medical attention after being exposed to tear gas?
- A. Less than 1%
 - B. Less than 10%
 - C. More than 15%
 - D. More than 25%

Value
2

Part B: Numeric-Response Questions

Use the following list to answer the next questions.

Various Traits of OC Pepper Spray and CS Tear Gas

- 1. Natural compound
- 2. Synthetic compound
- 3. Irritates the stomach
- 4. Irritates the eyes and nose
- 5. Soluble in fats and oils
- 6. Soluble in an alkaline solution
- 7. Used in riot control
- 8. Used upon unruly individuals

- ① 1. Four unique traits of OC pepper spray include **1** , **4** , **5** , and **8** .
- ① 2. Four unique traits of CS tear gas include **2** , **4** , **6** , and **7** .

*One trait is used twice—once in question 1, and once in question 2.
Your answers should be in ascending order.*

Value
7

Part C: Written-Response Questions

Provide appropriate answers to the following. Explanations are best given in sentences.

②

1. Why is a pepper spray with a lower concentration of OC often more effective than a pepper spray with a higher OC concentration?

• *Pepper sprays with low OC concentrations are less viscous or lighter than sprays containing higher concentrations of OC. (1 mark)*

• *The lighter the liquid in a spray, the faster it will penetrate the mucous membranes (1 mark)*

②

2. Explain why tear gas is often dispersed using grenades.

Tear gas grenades are useful in propelling tear gas over a great distance into large crowds. (2 marks)

①

3. Explain why OC pepper spray and CS tear gas are both considered “less-than-lethal” weapons.

Both pepper spray and CS gas are considered to be “less-than-lethal” weapons because they have only temporary effects upon individuals and individuals can be subdued without using a gun

②

4. Identify one similarity and one difference between pepper spray and tear gas.

Any one of the following similarities is acceptable for 1 mark

- *Both are considered to be less-than-lethal.*
- *Both are released through hand-held canisters*
- *Both cause only short-term physiological effects.*
- *Capsaicin and CS are solids.*
- *Both irritate the eyes, nose, mucous membranes, and skin.*

Any one of the following differences is acceptable for 1 mark

- *Tear gas causes severe coughing/irregular breathing.*
- *Tear gas washes out with alkaline solution (such as baking soda solution).*
- *Pepper spray washes out with fat and/or oil solution (such as milk or dish detergent)..*
- *Tear gas effects last less than 15 min; pepper spray effects last 30-45 min.*
- *Tear gas is used to subdue large crowds; pepper spray is used to subdue unruly individuals.*
- *OC never dissolves in water; CS gas eventually dissolves in water.*
- *Pepper spray is from a natural compound but tear gas is synthetic.*

**Total
23****Lesson 3 Assignment: Police Canines****Value
10****Part A: Multiple-Choice Questions**

Decide which choice best completes the statement or answers the question. Print the letter that corresponds to your choice on the blank next to the question.

 B 1. Which sense is 50 times more sensitive in dogs than in humans?

- A. Taste
- B. Smell
- C. Touch
- D. Vision

 A 2. The row that identifies the site of olfactory sensory receptors and the number of these receptors in one dog is

Row	Location of Receptors	Number of Receptors
A.	olfactory epithelium	200 000 000
B.	cerebrum	5 000 000
C.	olfactory system	500 000 000
D.	mucous layer	15 000 000

 C 3. The first police dog training program in the world was established by

- A. France
- B. England
- C. Belgium
- D. Germany

 C 4. The first task that dogs performed for the RCMP was

- A. attacking
- B. searching
- C. pulling sleds
- D. tracking missing persons

- C 5. The most popular breed of dog used in law enforcement is
- A. Rottweiler
 - B. Belgian Malinois
 - C. German Shepherd
 - D. Labrador Retriever
- D 6. Police service dogs are most commonly used by police departments for
- A. detecting explosives
 - B. detecting illegal drugs
 - C. tracking and identifying missing persons
 - D. tracking and apprehending fleeing suspects
- C 7. Which helpful trait of police service dogs must be kept in check for law enforcement activities?
- A. Obedience
 - B. Sex drive
 - C. Aggression
 - D. Sense of smell
- C 8. When a police officer becomes involved in an Imprinting Program, he or she is responsible for
- A. training a police service puppy to chase and grab
 - B. the birth and delivery of a litter of police service puppies
 - C. the care and development of a police service puppy for one year
 - D. teaching a police service puppy to understand German commands
- D 9. Canine officers are usually trained to
- A. stop and bark until officers arrive on the scene
 - B. jump and seize until officer handcuff the suspect
 - C. bite and shake until its handler commands it to stop
 - D. grab and hold until its handler commands it to release

- B** 10. In general, a police service dog is considered most productive up to
- A. 5 years
 - B. 7 years
 - C. 10 years
 - D. 12 years

Value
2

Part B: Numeric-Response Questions

Use the following list to answer the next question.

Steps that Occur When an Odour is Detected by a Dog

1. The cerebrum interprets the odour.
2. A nerve impulse is generated.
3. Molecules of airborne odours dissolve in mucous.
4. Specialized olfactory sensory receptors are stimulated.

①

1. The correct sequence of steps that stimulate odour detection in a dog, as shown above, is **3** , **4** , **2** , and **1** .

Use the following list to answer the next question.

Descriptions of Various Police Service Dog Breeds

1. Herding dog that is very loyal and can make sharp turns
2. Very friendly and good natured; unsuitable as attack dogs
3. High energy, possesses a natural drive for protecting, tracking and obeying

①

2. Match each description above with the dog breeds given below.

Descriptions:

Testing Techniques:

 3

**German
Shepherd**

 1

**Belgian
Malinois**

 2

**Labrador
Retriever**

Value
11

Part C: Written-Response Questions

Provide appropriate answers to the following. Explanations are best given in sentences.

③

1. List three physiological features of dogs that make them valuable assets to police departments.

Any three of the following would be acceptable for 3 marks

- *A dog's sense of smell is discriminating; they can identify a specific scent even when dozens of other scents are present.*
- *The dog's olfactory system or sense of smell is 50 times more sensitive than a human's is.*
- *Dogs can run faster than most humans can; therefore, they can apprehend a criminal suspect who flees or subdue a suspect exhibiting violent behaviour.*
- *Police service dogs are able to catch a fleeing suspect by clamping on him or her with their powerful jaws.*
- *The loud barking of a police dog can be very intimidating to most individuals..*

②

2. Why must police service dogs be kept in special Canine Unit vehicles?

At times, a police service dog must remain in a patrol car for lengthy periods, such as while the officer is writing reports. Police vehicles used by canine officers have special alarm systems triggered if the ventilation system malfunctions and the interior of the vehicle becomes too cold or overheated. (2 marks)

②

3. Can any police officer become a police service dog handler? Explain.

To become a part of the Canine Unit in any police department, an officer must have several years of experience in policing. 1 mark

The potential officer is also expected to help voluntarily in dog training exercises by posing as a quarry. 1 mark

②

4. Why must a police service dog and its handler go through training together?

A police service dog and its handler are trained as a team because they must trust and understand each other completely if they are to function successfully together in stressful, high-risk, and unpredictable situations on the street. A handler must be able to control his or her dog completely so that it can be called off instantly when the situation warrants.

②

5. How are police service dogs trained to apprehend suspects?

Chasing and grabbing are introduced to the police service dog in training as a game that it plays only when its handler gives the appropriate commands. The dog is trained not to bite but to grab and hold the quarry until its handler gives the release command. (2 marks)

Total
20**Lesson 4 Assignment: Crime Case Studies Involving Law Enforcement Safety Equipment and Police Canines****Value**
10**Part A: Multiple-Choice Questions**

Decide which choice best completes the statement or answers the question. Print the letter that corresponds to your choice on the blank next to the question.

Historical Crime Case Study #1: The North Hollywood Shootout

- B** 1. The crimes committed in the past by the two suspects involved in the North Hollywood shoot out include
- A. sexual assault
 - B. armed robbery
 - C. second-degree murder
 - D. assault with a weapon

- C** 2. Which row identifies the weaponry used by the suspects and by the police during this incident?

Row	Suspect Weaponry	Police Weaponry
A.	explosives	handguns
B.	hunting knife	pepper spray
C.	high-powered assault rifles	handguns and shotguns
D.	soft body armour	high-powered assault rifles

- A** 3. What did banks in the Los Angeles area change because of the suspects' previous bank heists?
- A. Armoured car delivery times
 - B. Bank vault alarm system
 - C. Number of security guards
 - D. Number of employees on duty

- D 4. When one of the suspects discovered no more money was in the bank vault, he
- A. ran out of the bank
 - B. shot the bank manager
 - C. took several people hostage
 - D. fired at the ATM access point
- C 5. Why was the suitcase containing the stolen money eventually abandoned by the suspects?
- A. The police injured one of the suspects.
 - B. The bills in the suitcase were counterfeit.
 - C. The concealed dye packs destroyed the money.
 - D. The suitcase contained an electronic tracking device.

Historical Crime Case Study #2: Police Canine Makes the Ultimate Sacrifice

- D 6. When police officers first came into contact with Chad Yurko, he shouted
- A. biblical passages
 - B. obscenities at them
 - C. that he was going to kill them
 - D. that he wanted to commit suicide
- C 7. After Chad Yurko was first approached by police, he went
- A. into his house
 - B. into his garage
 - C. toward a school field
 - D. into a neighbour's yard
- A 8. What happened when Caesar was released upon Chad Yurko?
- A. Yurko shot and killed Caesar.
 - B. Yurko was bitten and collapsed.
 - C. Yurko ran and was apprehended by Caesar.
 - D. Yurko shot himself and lost consciousness.

- A** 9. What dog breed was Caesar?
- A. Rottweiler
 - B. German Shepherd
 - C. Belgian Malinois
 - D. Labrador Retriever
- B** 10. How many years did Chad Yurko spend in prison for this incident?
- A. 1
 - B. 2.5
 - C. 10
 - D. 25

Value
2

Part B: Numeric-Response Questions

Historical Crime Case Study #1: The North Hollywood Shootout

Use the following information to answer the next question.

Possible Events that Occured in the North Hollywood Shootout

1. A bank security guard called police.
2. A witness walking by contacted police.
3. Both suspects were shot and killed.
4. Both suspects survived and were apprehended.
5. Thirty-two police officers were involved in this case.
6. Three hundred seventy police officers were involved in this case.
7. Each suspect was wearing soft body armour.
8. Only one suspect was wearing body armour.

①

1. Some events that occurred in the North Hollywood Shootout, as shown above, include **2** , **3** , **6** , and **7** .

Record your answers in ascending order.

Historical Crime Case Study #2: Police Canine Makes the Ultimate Sacrifice

Use the following information to answer the next question.

Events that occurred in the Chad Yurko Incident

1. First Caesar is shot; then, Chad Yurko is shot.
2. Caesar is released and runs towards Chad Yurko.
3. Chad Yurko fires several shots in the air in a school field.
4. Police confront a suicidal Chad Yurko carrying a shotgun.

①

2. The correct sequence of events in the Chad Yurko incident, as numbered above, is 4 , 3 , 2 , and 1 .

Value
8

Part C: Written-Response Questions

Provide appropriate answers to the following. Explanations are best given in sentences.

Historical Crime Case Study #1: The North Hollywood Shootout

②

1. Despite the police surrounding the bank when the suspects left, the shootout lasted 40 minutes. Explain why police took so long to apprehend the two suspects.

Each suspect was heavily armed with several different assault rifles. (1 mark)

One suspect was covered in soft body armour, and the other suspect was wearing a bullet-resistant vest. (1 mark)

(2)

2. Explain why police did not use pepper spray, tear gas, or police canines to subdue the two suspects in this case.

Tear gas or pepper spray was not used because both suspects were moving continually outdoors and firing automatic weapons. (1 mark)

Any police dog that may have attempted to capture the suspects would have likely been shot immediately by the suspect with high-powered weapons. (1 mark)

Historical Crime Case Study #2: Police Canine Makes the Ultimate Sacrifice

(2)

3. Give two reasons Caesar was released upon Chad Yurko.

- Patrol officers had no long-range weapons. (1 mark)***
- Yurko was walking towards a school and police were concerned he might try to harm people within the school. (1 mark)***

(2)

4. If the EPS Tactical Squad had arrived before Caesar was released, how would the conclusion of this incident likely have been different?

Because the EPS Tactical Team carries high power assault rifles, they could have shot Yurko from a distance thereby preventing Caesar from being killed and preventing Yurko from going towards the school. (2 marks)

End of Assignment Booklet 2
