

Forensic Studies 35

Next Step Summer School (780) 467-7929

dylan.shott@eips.ca

Course Description:

Forensic Studies 35 is a 3-credit course that allows students to study scientific concepts and technologies related to solving crime in society. Students will use reasoned approaches to the analysis of forensic evidence and the examination of the ethical considerations surrounding the collection and use of forensic evidence. Students will draw on their existing curricular knowledge and will be challenged to look at problems in a new way, thereby creating unique pathways of thought. Through the study of forensics, students will recognize the importance of having both an open mind and the intellectual flexibility to change their opinions and positions when necessitated by evidence.

Course Structure:

Module	Course Topics	Assessment	Due Date
1 Forensic Toxicology	• The Effects of Illegal Drugs upon the Human Body • The Effects of Poisons and Toxins • Forensic Toxicology Testing Techniques • Crime Case Studies Involving Forensic Toxicology	4 lesson quizzes, 1 written assignment, 1 module assessment	
2 Law Enforcement Equipment	• The Bullet-Resistant Vest • The Conducted Energy Device • Pepper Spray and Tear Gas • Crime Case Studies Involving Law Enforcement Safety Equipment	4 lesson quizzes, 1 written assignment, 1 module assessment	
3 Arson and Explosives	• Combustion and Arson • Investigating Arson Fires • Explosives • Crime Case Studies Involving Arson and Explosives	4 lesson quizzes, 1 written assignment, 1 module assessment	
4 Ballistics	• Firearm Basics • Ballistic Fingerprinting and Wound Ballistics • Testing for Gunshot Residue • Crime Case Studies Involving Forensic Ballistics	4 lesson quizzes, 1 written assignment, 1 module assessment	
5 Criminal Profiling	• Creating a Criminal Profile • The Use of Criminal Profiling in Homicide Investigations • Geographic Profiling • Criminal Profiling in Homicide Crime Case Studies	4 lesson quizzes, 1 written assignment, 1 module assessment	
6 Forensic Anthropology and Entomology	• Determining Ancestry and Sex from Human Skeletal Remains • Determining Traumatic Injuries from Skeletal Human Remains • The Use of Forensic Entomology in Criminal Investigations • Crime Case Studies Involving Forensic Anthropology and Forensic Entomology	4 lesson quizzes, 1 written assignment, 1 module assessment	
Module Assessments	• end of module assessments (1-6)	Online quiz (1 attempt)	
Final Exam	• covers material from Modules 1-6	Online exam	

		(1 attempt)	
--	--	-------------	--

Important Dates: 1: Modules 1-2 must be completed and submitted by Wednesday, July 10th, 2024.
 2: Modules 3-4 must be completed and Submitted by Wednesday July 17th, 2024.
 3: Modules 5-6 and the Final Exam must be completed and Submitted by Wednesday, July 24th, 2024.

Assessment:

As indicated in the preceding table, your mark in this course will be based on several components:

1. Assignments - 60%

These are treated as formative until you write the module assessment. They allow you to apply the knowledge you have learned to scenarios and situations that could be encountered in the field of Forensic Science. Each assignment will cover the material in all lessons in the module.

2. Module Assessments - 25%

These assessments are to be completed as a demonstration of your learning of the concepts in each module. These are summative so you can only attempt the assessment once.

3. Final Exam - 15%

This exam represents the entire course, and you will gain access to it when you schedule a time to complete it.

PowerSchool:

Make sure you are accessing PowerSchool regularly to monitor your progress and review assessment information. The due dates provided will be placed in the comment area for each assignment. This allows the teacher to keep track of your progress and to ensure you complete the course. If you are not going to meet a deadline, please contact your teacher with a plan on when you expect to submit the missed assignment. This will be noted in the assignment comments. Any assignment not handed in by the due date will receive an NHI until the assignment is handed in. Late assignments will be flagged as late unless you have previously communicated with your teacher. Any assignment handed in will be checked off, when the assignment is assessed, a percentage mark will be entered. If something does not seem correct, or information appears to be incorrect, please contact your teacher so errors can be fixed promptly.

Additional Credit: As part of your programming you will also be receiving credit for *Student Centered Learning 15* (3 credits) as well as *COM 1255* (1 credit). Outcomes for these courses are already achieved via display of skills through normal course achievement.
